#### **ZC-3111** Peroxide XLPE Insulation Compound for MV Cable up to 35kV

This material is a kind of crosslinkable polyethylene insulation compound. It is made of high quality PE resin, dicumyl peroxide agent and antioxidant agent by plasticizing granulation. Production process uses the closed system; Loss-in-weight Feeder which guarantees stable precision of components. It has stable physical and chemical index and good processing property.

**Application:** 35kV crosslinkable cable insulation; Maximum working temperature is 90℃.

#### Property

ltem		Unit	Test method	Typical value
Density@23℃			ASTM D792	0.92±0.01
Tensile strength		MPa	IFC C0011 1 1	22.5
Elongation at break		%	IEC 60811-1-1	540
Impact embrittlement performance@-76℃	Failure number	umber Piece ASTM D746		0/30
After aging	Tensile strength variation	%	IFC 60011 1 2	+4

# **Processing**

Recommend to use conventional extruder (three layers co-extrusion, draw ratio is from 20:1 to 30:1) and other equipments need to be adjusted according to the circumstance.

Zone	Feeding Section	Compression Section	Homogenization Section	Model Section
Temperature Range <sup>°</sup> C	90-100	100-110	105-115	110-120

<sup>-</sup> Above temperature is only for reference.

# **S**torage

keep at room temperature; Storage environment should be clean, dry and ventilated; Best use within six months from the date of production.

# Product packing

500kg in each package; Inner lined with plastic sealed film bag; Corrugated carton with tray at the bottom.
